

BFC Technology Policy Committee 2023-2024

Meeting 02 (10/05/2023)

Attendees

Logan Paul, Laura Karcher, Curtis Bonk, Daniel Hickey, Joe Utagawa (Student), Jeremy Siek, Heather Calloway, Ethan Fridmanski, Nancy Evans, Alex Alexeev Michele Kelmer (UITS), David Taylor (BFC)

Agenda

1. Welcome/intros/check in. [Logan]
 - Joe is the CTO for the GPSG. He is a GSGP/Art History major.

2. Recent issue with research storage; revisit prior conversation from prior years about best practice and if there is potential policy that needs to be revised/created. [Logan]
 - Collections (HC) has a similar problem, especially with migrations. Including collections in this discussion would be huge.
 - LK: trend with researchers who are in practice for many years, they are not sure how to manage the best practices. There is still extreme frustration with the moves from one system to another, this will be a long tail.
 - JS: A lot of it has to do with permissions and how things work. For example, Choosing Google Drive.
 - For a “Here is how to do research data storage,” need to make sure to address how ownership works within different systems.
 - Logan to poll the committee to see who wants to be on a small group to work on building out a best practice document for the UITS KB.

3. Report from the Summer 2024 DMAI Task Force. [Logan]

4. Brainstorm the committee’s role with regard to Generative AI. [Logan]

5. Comments/Questions/Concerns.
